Office Action Summary	Application No. 10/509,234	Applicant(s) VOGTMEIER ET AL.	
	Examiner Eric D. Bertram	Art Unit 3766	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

3. The correct statement should read: "I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56."

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Dempsey (GB 2285135). Dempsey discloses a response system for detecting, locating and responding to a person with a potential emergency medical condition (see

Abstract). Dempsey discloses a processor 22 arranged to provide the current position of the patient to an EMS site when the medical monitor 15 detects a potential medical condition. The monitor includes a sensor to acquire a signal related to the physiological condition of the patient, such as an ECG signal, a glucose level, or brainwave activity, among others (see page 11). If the output is an ECG signal, analyzer 18 can process the acquired signal to establish where in the heart the problem as occurred (i.e., atrial or ventricular arrhythmias) and then send a trigger signal to processor 22 (see text abridging pages 14 and 15). The processor 22 can then generate an alarm upon receiving the trigger signal to send the current location of the patient, as provided by GPS receiver 26, through transmitter 27 (see text abridging pages 20 and 21).

Dempsey discloses that the GPS receiver (which along with the transmitter is read as the PIM device) is portable, and that it also includes a memory to store position information that is inherently in communication with the receiver (see page 19). The stored position information is considered a dwell position.

6. Regarding claim 3, Dempsey discloses the use of a terrestrial positioning signal from beacon 31 (See page 12).

7. Regarding claim 12, all processor s are inherently programmed with a user interface, at least initially.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric D. Bertram whose telephone number is 571-272-3446. The examiner can normally be reached on Monday-Thursday from 8:30-7 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Layno can be reached on 571-272-4949. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
